# TECEone – THE TOILET WITH SHOWER FUNCTION

Refreshingly different!

# FEEL THE TOTAL REFRESHMENT!

You know it, that sense of well-being that sets in right after a shower. What if you could experience that pleasant feeling right after going to the toilet as well? If you experienced the gentle cleansing of a soft, warm jet of water that left you with nothing than the utmost freshness?

“Utmost comfort in your first very own bathroom? Of course! But please, not at luxury prices.”

“Refreshment is totally my thing. In every sense!”

## **Unusually good: TECEone!**

Cleaning with water is fast becoming the new standard in intimate hygiene. It's no wonder, because it fulfils the perfectly human need for cleanliness and freshness. With its shower function, TECEone brings you pure refreshment after using the toilet. Simple. Comfortable. And at an attractive price.

## Freshness at the push of a button

Please make way for a new feeling of freshness! This is brought to you by a turn of the easily reachable regulators mounted on the side of the ceramic. TECEone ensures greater comfort with this, too: through simple operability and uncomplicated technology in a modern design.

### As you like it

The temperature regulator on the left allows you to set the water temperature individually up to 38 °C. The water regulator on the right lets you regulate the water volume to suit your needs. The shower arm is pushed out and then you can get started.

## Hygiene doesn't require electricity

What separates TECEone from other shower toilets? The fact that it functions totally without electricity! The shower function is easily controlled using the water pressure. Here the warm water for the hygienic cleaning comes directly from the pipe. This means: no complicated electronics that could fail. Intuitive operation without having to study a manual. And no new technology for your plumber, who can handle installation and maintenance completely independently.

- 1 The shower arm extends under water pressure. The shower nozzle caps come in four versions which differ from each other in terms of intensity and position of the shower spray.
- 2 Temperature regulator
- 3 Water regulator

## **The most natural thing in the world**

Cleaning with water – as pleasant as it is effective. With TECEone you can always experience the unique feeling of cleanliness and freshness whenever you need it. Effortless and comfortable.

## Suits you

TECEone not only shines with inner values – it looks good too! Thanks to the timeless, elegant design, it integrates into any bathroom ambience and combines well with your existing bathroom furnishings. And because no electronics have to be housed, it saves as much on space as a normal toilet.

## Everything thought of

Modern hygiene, modern features.

The soft close drop function stops the toilet from closing with a loud bang. Comfort for your ears too!

3

## Clean performance

The rimless design of the TECEone makes it particularly easy to clean. The shower arm even cleans itself: fully automatically before and after each clean.

An important advantage: During the pre-rinse the cooled water in the pipe can be flushed out.

2

## How convenient

The ergonomically designed toilet seat is optimally adjusted to your body shape and is thus totally comfortable. Another plus in comfort: Thanks to the clever attachment with bolts installed in the factory, it's absolutely wobble-free and can be easily removed and replaced for cleaning.

- 1 Soft close drop function
- 2 Ergonomic toilet seat
- 3 Self-cleaning of shower arm
