# SIMPLY DIFFERENT!

The perfect toilet family –  
TECEone product range

**NEW**

# FUTURE-PROOF WITHOUT POWER

TECEone is the proof that advanced technology also works without electricity. The warm water for cleaning comes directly from the pipe. TECEone is thus setting benchmarks for greater comfort in intimate hygiene.

With minimum effort for assembly and maintenance!

“No power, no complicated electronics, no problem with the installation!”

### TECEone is different

Complicated electronics, expansive dimensions, high cost – features that have so far contributed little to the decision to install a shower toilet. We’re changing the rules of the game with TECEone: Thanks to the unpowered shower function, it’s as simple to install as a shower fitting. TECEone is also intuitive and comfortable in its operation. And it’s so beautifully designed and compact that it fits in any bathroom.

### Product advantages

- No water tank, no power connection, no boiler
- Simple installation and maintenance
- Intuitive operation with two regulators
- Compact dimensions
- Timeless and elegant design
- Attractive price-performance ratio

# Shower function made easy.

## Freshness at the push of a button

Shower toilets are more than a trend: They improve hygiene and are already now establishing themselves as the new standard in modern bathroom design. We're going one step further with TECEone: with utmost operating comfort and well designed features for simple cleaning.

3

4

- 1 The shower arm extends under water pressure. The shower nozzle caps come in four versions which differ from each other in terms of intensity and position of the shower spray.
- 2 Temperature regulator to individually set the water temperature up to 38°C
- 3 Water regulator for adjusting the quantity of water as required up to 5.6 litres per minute
- 4 Automatic self-cleaning of the shower arm before and after every use

# Less technology, more security.

## Easy functioning

We like it when technology is simple. Therefore, we have also focused on the essentials with TECEone - for efficient, safe and above all relaxed installation and maintenance.

### Quality guaranteed!

TECEone complies with the requirements of EN 1717 and EN 997.

The safety system integrated into the TECEone for the protection of potable water complies with the requirements of DIN EN 1717. TECEone can thus be directly connected to the hot and cold water pipe. The ceramics and toilet seat also both meet the respective applicable standards DIN EN 997.

## One design. Three levels of pure joy.

Not every toilet in the house has to be a shower toilet. But you shouldn't have to choose a different toilet design for each bathroom.

That's why TECEone is designed as a toilet family. With and without a shower function: the same design, the same comfort, the same properties. You can only tell the subtle difference in ease of cleaning by the side-mounted operating elements. That makes TECEone the perfect toilet family. And the perfect toilet for the whole family.
