Shower toilet TECEone

SIMPLY DIFFERENT!

Simple to install.
Simple to handle.
Comfortable to use.

As warm
and
cold water
version

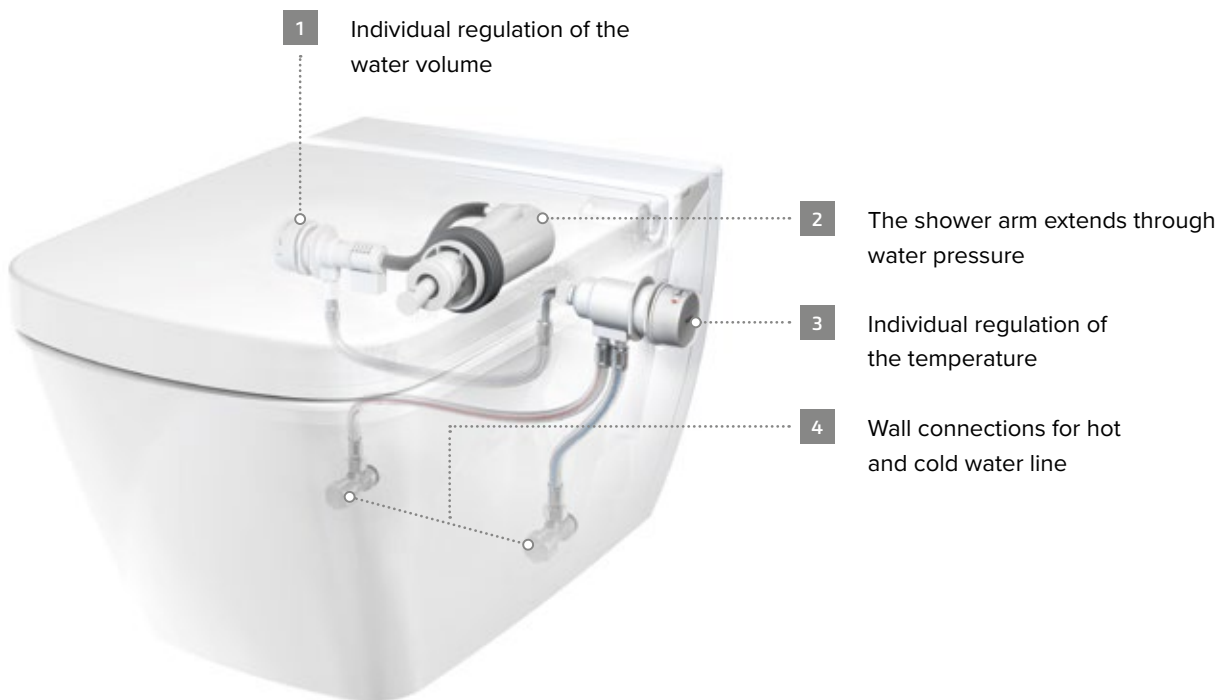

FUTURE-PROOF WITHOUT ELECTRICITY

TECEone is the proof that advanced technology also works without electricity. The water for cleaning comes directly from the pipe. TECEone is thus setting standards for greater comfort in intimate hygiene. With minimal effort for assembly and maintenance!

“No electricity,
no complicated
electronics,
no problem with
installation!”

TECEone is different

Complicated electronics, expansive dimensions, high costs – features that have so far contributed little to the decision to install a shower toilet. We’re changing the rules of the game with TECEone: thanks to the electricity-free shower function, it’s as simple to install as a shower fitting. TECEone is also intuitive and comfortable in its operation. And at the same time, it’s so beautifully designed and compact, that it fits into any bathroom.

Product advantages

- No water tank, no power connection, no boiler
- Simple installation and maintenance
- Intuitive operation with two regulators
- Compact dimensions
- Timeless and elegant design
- Attractive price-performance ratio

Shower function made easy.

Freshness at the push of a button

Shower toilets are more than just a trend: they improve hygiene and are already establishing themselves as the new standard in modern bathroom design. We're going one step further with TECEone: with the highest level of user comfort and well designed features for simple cleaning.

1

- 1 The shower arm extends through water pressure. The shower arm caps come in four versions which differ from each other in terms of intensity and position of the shower spray.
- 2 Temperature regulator to individually set the water temperature up to 38°C
- 3 Water regulator for adjusting the quantity of water as required up to 5.6 litres per minute
- 4 Automatic self-cleaning of the shower arm before and after every use

»Fresh potable water from the tap should be preferred to water from a tank in terms of hygiene«

Dr. Calin Burtica,
Colo-Proctology Centre, Stuttgart
Photo: Johannes Wosilat

Clean in every respect.

Leading physicians today increasingly recommend again what Sebastian Kneipp already knew: body cleansing with fresh water is the best choice in many cases.

So TECEone represents an effective and medically recommended support for intimate cleaning. At an attractive price.

Less technology, more security.

It simply works

We like it when technology is simple. Therefore, we have also focused on the essentials with TECEone - for efficient, safe and above all relaxed installation and maintenance.

Quality guaranteed!

TECEone complies with the requirements of EN 1717 and EN 997.

The safety system integrated in the TECEone for the protection of potable water complies with the requirements of DIN EN 1717. TECEone can thus be directly connected to the hot and cold water pipe. The ceramics and toilet seat also both meet the respective applicable standards DIN EN 997 and DIN 19516.

NEW

One design. Three levels of pure joy.

Not every toilet in the house has to be a shower toilet. But you shouldn't have to choose a different toilet design for each bathroom.

That's why TECEone is designed as a "toilet family". With and without shower function: the same design, the same comfort, the same properties. You can only tell the subtle difference in ease of cleaning by the side-mounted operating elements. That makes TECEone the perfect "toilet family". And the perfect toilet for the whole family.

The pure TECEone experience – even for those who prefer a warm shower.

With the new TECEone variant for the cold water connection, everyone involved benefits. End customers benefit from the health advantages of intimate cleaning with fresh, clear water. Experts from a particularly easy installation and retrofitting of a shower toilet.

NEW

Sounds uncomfortable?

What may sounds cool and uncomfortable feels surprisingly pleasant and refreshing – cleaning with fresh, clear water straight from the tap. Because bottom hygiene is not the same as a full-body shower. What is a matter of course for washing your hands also applies to going to the toilet: **once you have tried it, you'll swear by it.**

Good for the specialist

- Suitable for every bathroom
- Can be retrofitted in existing buildings without construction and tiling work
- Integrated backflow preventer (DIN EN1717)
- Saves time and costs

Good for the wallet

- Upgrade to a shower toilet is simple and works without cost-intensive renovations
- Fully-fledged shower toilet with shower arm passage through the ceramic
- No costs for hot water heating

Good for your health

- Cool is not cold, certainly not with fresh water from the tap
- Increases energy levels and stimulates the metabolism
- Like the Kneipp cure for the buttocks
- Recommended by doctors

Retrofitting is that simple.

The new TECEone for cold water connection makes upgrading from a standard toilet to a shower toilet a child's play – quick, uncomplicated, without dirt and noise. Grateful customers are guaranteed.

The TECEone shower toilet is usually installed with a hot water connection. However, TECEone is also the perfect solution for daily buttocks hygiene in all cases where no hot water pipe can be connected to the toilet.

The TECElux terminal can be retrofitted to a TECEone in just a few steps. You can see how easy it is in the video.

Experience confirms it: the TECEone shower toilet is made for prior consultation and final installation by a trained specialist.

Also with a view to installation, especially when retrofitting from a standard toilet to a shower toilet, TECEone also offers clever solutions for the specialist.

Convincing performance

Impressed partners, tradesmen and customers report on the advantages that a TECEone shower toilet offers – simple installation, electricity-free operation and a feeling of freshness whenever you want. Check it out for yourself!

The range

This is TECEone

Rimless toilet ceramics with integrated shower function for comfortable cleaning of the intimate area using water.

Also available without shower function.

Matching upgrade sets are available for water connections for brick-wall and dry-wall construction.
