

TECEflushpoint Pneumatic Flush Controls

Description:

The TECEflushpoint product range has been designed to provide an elegant contemporary 'flat' design flush control range, and is available in 3 different colour options, and in 2 different designs. The two differently sized buttons for full and partial flush are designed so they can sit flush with the rest of the plate, and give TECEflushpoint a sleek, modern, and minimalist look. Produced using high quality materials, and attached to long hoses, the TECEflushpoint actuation buttons can be positioned up to 1.7m away from the cistern. Supplied with all fittings and instructions. **E&OE**

Applications:

TECEflushpoint dual flush pneumatic control buttons are matched exclusively to the TECE range of concealed cisterns and installation systems suitable for WC's in en-suites, cloakrooms and other bathroom projects. The control push buttons are fitted to cisterns that are suitable for :

- All common construction systems, in domestic, commercial, and institutional new build or refurbishment projects.
- Large or small bathrooms, where space is at a premium, while ease of cleaning and design is a priority.
- Premium design-led bathroom installations, where aesthetic considerations require sleek product solutions.
- The product range are surface mounted onto walls and take up minimal space

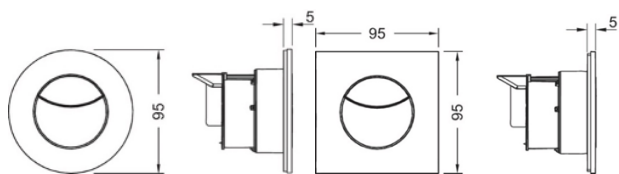

Product characteristics & key features:

- The TECEflushpoint dual flush control buttons sit only 5mm proud of wall finish when installed.
- Flush buttons sit parallel with the rest of the plate surface providing a streamline design.
- Access to cistern internals still achievable using maintenance cover (accessory required).
- Designed to suit all TECE produced standard depth WC cisterns and WC cistern frames and can be mounted up to 1.7m away from WC pan.
- Spring loaded buttons allow for smooth linear actuation.
- Can be used independently, or in addition to all TECE flush plates if required.
