

TECE

HYGENIC, PROVEN, VERSATILE

TECE drain sets - shower channels and point drains in a well-thought-out design and highest quality.

Drainage systems

close to you

TECE DRAIN SETS LINEAR OR POINT DRAINAGE WITH CLASS

The TECEshowerline linear drainage system offers the highest stainless steel quality along its entire length. And the new TECEshowerpoint sets bring the drainage of your bathroom straight to the point.

» I don't want to be searching around for all the different parts on site. Everything I need must be directly available in a box. «

Protected against sewer gases and vermin

The odour traps for the TECEshower sets reliably prevent the escape of sewer gases and at the same time provide a secure barrier against unwanted vermin in the bathroom.

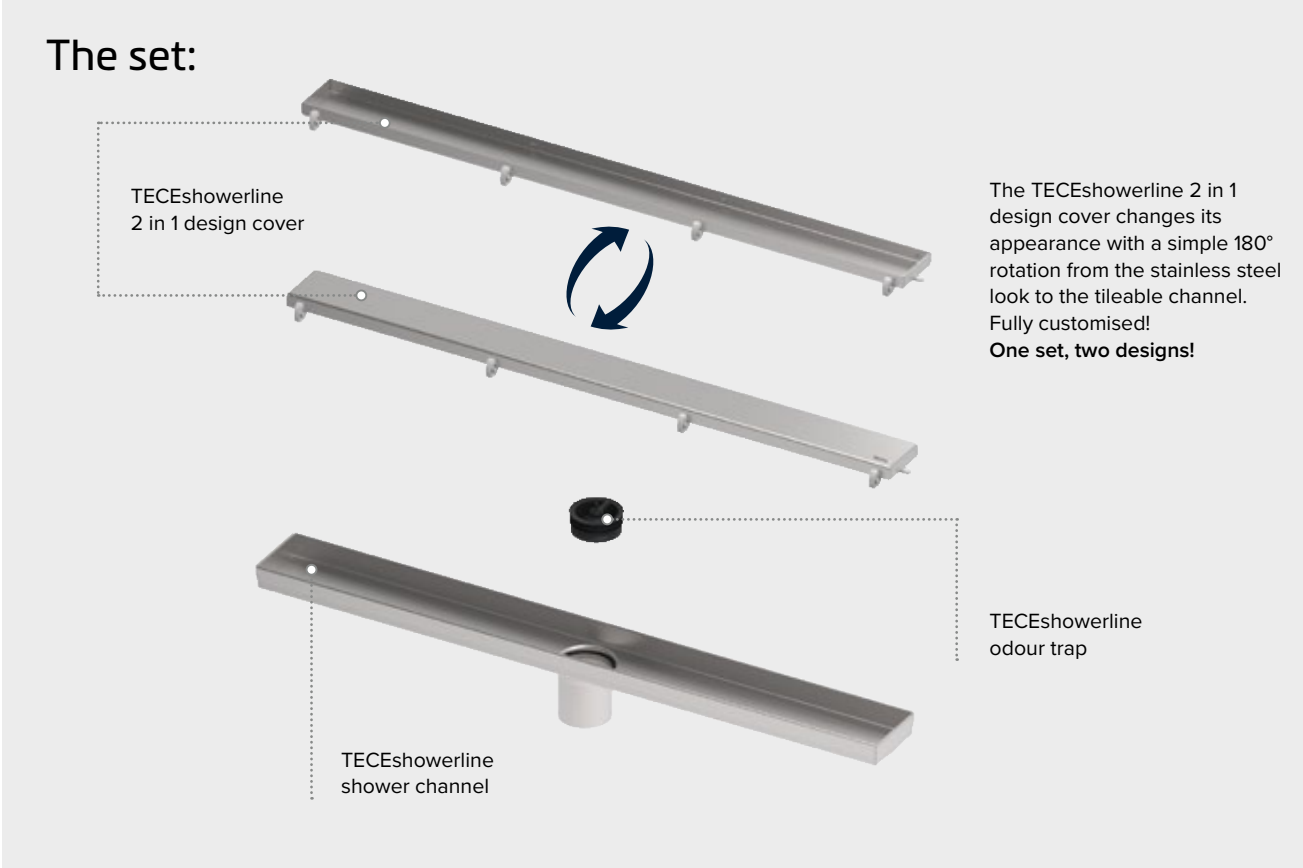

In addition, with a drainage capacity of at least 0.8 l/s, they offer the optimal, invisible connection point between the designer bathroom and the drainage system. In combination with the matching hair trap, the TECEshower sets offer comfort and hygiene at a high level.

Advantages of the TECE drain sets

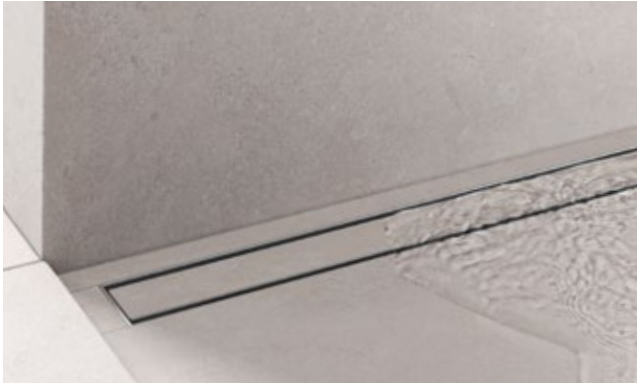

- Thanks to the integrated three-dimensional gradient in the base body of the shower channel and the point drain, the TECE drain sets offer maximum hygiene and cleanliness
- Drain body made of high-quality polished stainless steel, material 1.4301
- Available with '2 in 1' reversible grate or for natural stone
- Designed for direct connection to a vertical drainage pipe

TECEshowerline with 2 in 1 design cover

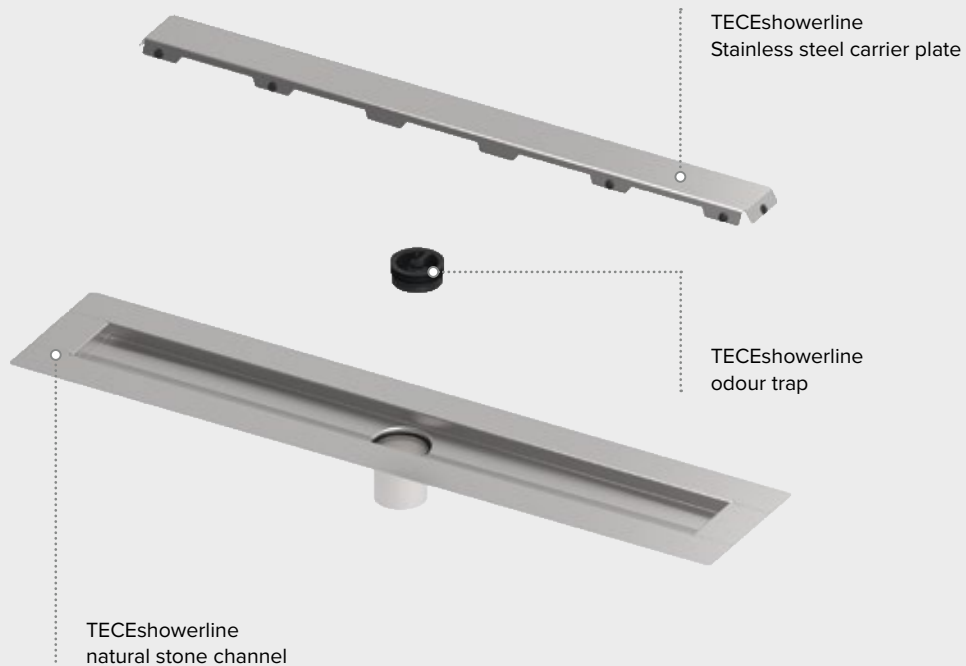

Decide on site

Use the stainless steel look to achieve a high-quality eye-catcher in your shower area. Alternatively, you can opt for the tileable channel for a narrow stainless steel frame that supports your design concept.

TECEshowerline natural stone channel

The set:

The technology

Thanks to clever details, the TECEshowerline shower channel for natural stone can be installed quickly and safely. The high-quality stainless steel flange offers a large area for installation of a sealing tape.

The result

An all-around narrow gap of 6 to 8 mm – that's all you need to ensure efficient drainage of the floor-level shower area.

TECEshowerpoint with 2 in 1 design cover

The full design variety also with TECEshowerpoint

With the TECEshowerpoint with 2 in 1 design cover, you can also decide at the construction site:

You choose the stainless steel look: then a brushed stainless steel look supports your design in the bathroom.

If you opt for the tileable channel version on site, the water runs into the drain body between two narrow stainless steel bars. Elegant and discreet at the same time.

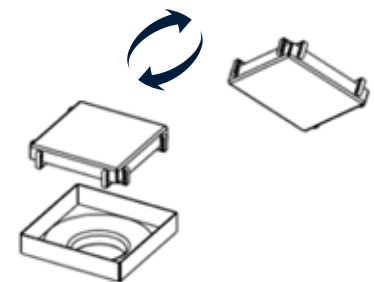

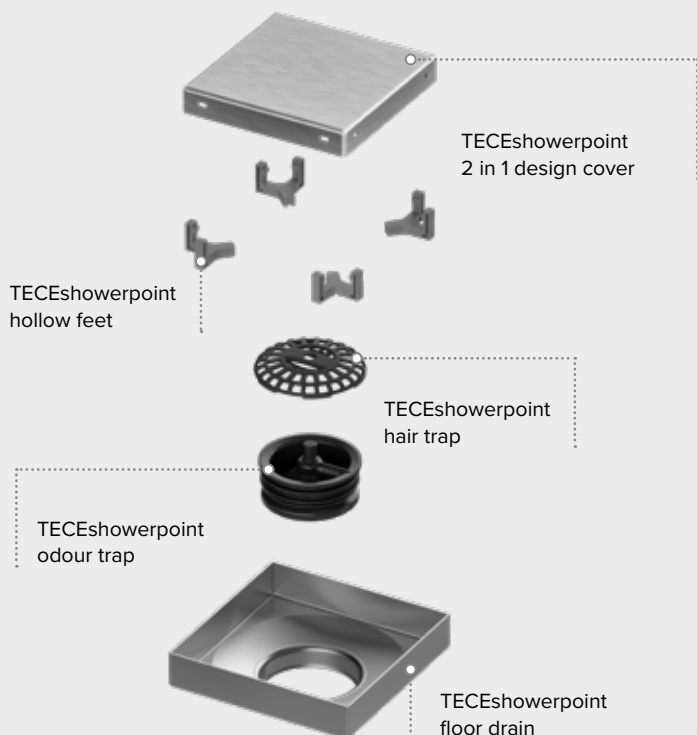

1

2

- 1 Stainless steel cover
- 2 Tileable channel
- 3 Frameless tile base

The set:

This can be achieved by simply turning the insert. The insert is always mounted on 4 recessed feet so that the stainless steel parts do not rub against each other and dirt and deposits have no chance.

TECEshowerpoint drain set for natural stone

The alternative

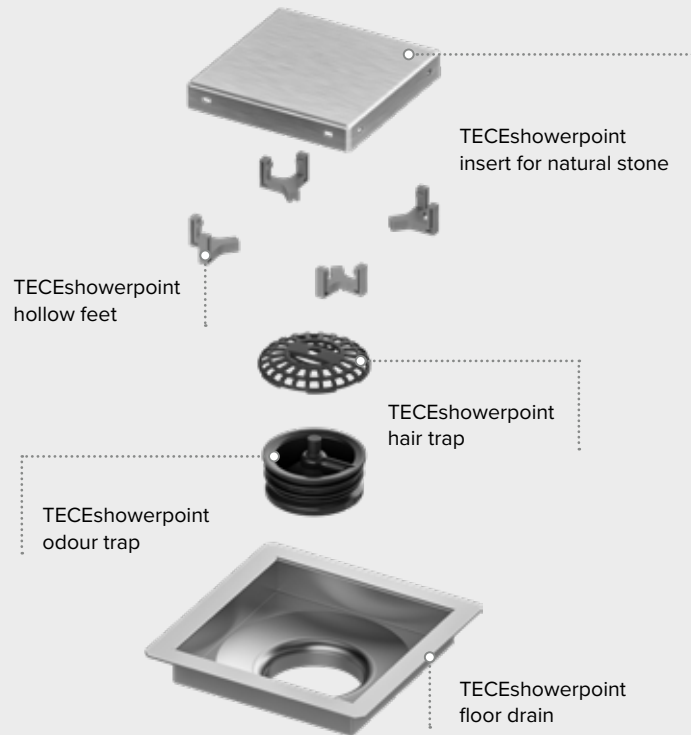

The TECEshowerpoint frameless tile base for use with natural stone tiles. Minimalist design for a maximum appearance.

Only a narrow gap remains visible, which collects the waste water from all sides.

3

The set:

Advantages of TECEshowerpoint

- Base body and grate made of stainless steel 1.4301
- Designed for direct connection to a vertical drainage pipe
- Both sets optionally available in 100 mm (with drain connection in $d = 50$ mm) or 150 mm (with drain connection in $d = 100$ mm)
- Sets always complete with mechanical odour trap and hair trap
- Internal 3D gradient also ensures optimum self-cleaning in the TECEshowerpoint point drain
- The mechanical odour trap reliably prevents the escape of sewer gases and unwanted bugs.

Product range overview

Illustration	Product	Dimension	Item no.
	TECEshowerline set with 2 in 1 design grate Without sealing flange	700 mm	15201070
		800 mm	15201080
