DESIGN IN FULL WIDTH

TECElineo shower channel set

Drainage systems

close to you

SIMPLE DESIGN, FITS INTO DIFFERENT ROOM CONCEPTS

The TECElineo shower channel set guarantees smooth water drainage with no interfering corners or edges. Thoughtfully engineered and with a clean design, it integrates flexibly into any bathroom layout. It is now available in brushed stainless steel and with black PVD coating.

“When it comes to shower drainage, I want it to be easy to install and simple to clean.”

The advantages

Brushed
Stainless Steel

Brushed
Black

A high-angle photograph of a modern shower area. The shower is enclosed by a glass partition on the left and a wall on the right. The walls and floor are made of large, light-colored stone tiles. On the left, there is a built-in bench with a white cushion featuring a large orange circle. A glass door is partially open, revealing a textured rug outside. The shower fixtures include a wall-mounted showerhead with a black handle and a silver hose, and three small circular controls. A drain is visible at the base of the shower. Sunlight streams in from the left, creating a bright patch on the floor. A dark towel hangs on a hook on the right wall.

PERFECTLY INTEGRATED
AND HYGIENIC

EVERYTHING FLOWS SMOOTHLY

Where no corners and edges slow down the flow, everything runs smoothly. Pleasant both for the eye and for hygiene.

Clean in no time

Featuring self-cleaning effect

The inner gradient optimises drainage of water and the self-cleaning effect, thereby reducing the amount of cleaning required. It also reliably prevents puddles from forming.

With the simplest of tools

Rinse, wipe, done: a simple cloth is all you need to clean the low-maintenance stainless steel TECElineo.

Very simple

Immersion pipe with membrane odour trap can be removed for cleaning.

Clever technology for simple installation

More design freedom

The stainless steel profile can be shortened from 1000 mm on both sides to up to 400 mm, allowing it to be adapted exactly to the dimensions of any shower area. This creates an aesthetic overall impression without tile fragments on the sides especially with large-format tiles.

Hinged flange of the drain for installation flush with the wall.

The drain can be positioned directly on the wall for wall coverings from 10 mm incl. tile adhesive.

Sealing sleeve included

A sealing sleeve is included in the set to create the composite seal.

Adjustable to suit

Alignment of parallelism to the wall.
Height adjustment for tile thickness
8-18 mm including tile adhesive.
