

TECEbox 980mm Concealed Cistern

Article Number: 9041337

Description:

Engineered in Germany, a compact 980mm (Nominal), 8cm WC Cistern tank, designed to be compatible with most common Back to Wall WC pans. A “plug ‘n’ play” cistern, complete with all required components for installation. Can fit in front of structural walls, or within fabricated walls. Compatible with all TECE produced mechanical Control Plates, which connect and operate by front actuation. Premium quality cisterns which are quick and easy to fit. This WC cistern has all fixtures, fittings and instructions included. **E&OE**

Applications:

TECEbox concealed Cistern Especially designed for installation within Stud walls, suitable for connecting and supplying water to Floor Standing / Back to wall WC Pans in bathrooms, en-suites, cloakrooms & other bathroom projects. Suitable for:

- All common construction systems, in domestic, commercial, industrial and institutional new build or refurbishment projects
- Small or large bathrooms, where space is at a premium, while ease of cleaning and sleek design is a priority.
- Fitted onto structural walls or within stud walls, drywalls and furniture, and subsequently hidden with wall boards, tightly fixed to a framework, to conceal cistern, pipework & control mechanisms.
- Rapid, secure fitting of cistern allows universal connection to WC pans from all major brands.
- Can be used with Grey rainwater recycling systems when adequately filtered.

Product characteristics & key features:

- TECEbox UK Concealed Cistern (WRAS Approval Nr. 2203336) 980mm with front and top access panel & control mechanism meets or exceeds common standards.
- Front or top actuation with matching range of single or dual flush, contemporary control plates suit all concealed cisterns, and act as a removable cover for easy maintenance access to internal workings.
- 980mm height allows for the installation into bathroom construction installations, where space and height restrictions are not a requirement.
- Innovative (tool free adjustable) maintenance tunnel technology: Fitted to front of cistern at point of installation and easily adjusted to suit wall build thickness. Tool free adjustment reduces margin of error and potential hazard for installer. Also tidies up cavity between flush controls and cistern tank, and prevents debris from entering cistern when splash guard is removed – A common installation challenge.
- Quick release splash guard with lifting mechanism can be easily removed, allowing for maintenance or replacement of all key internal components.
- Factory fitted cistern components incl. 1/2" male water connection, stop valve, Stainless Steel Fill Hose, Quick-to-service flush valve, & fast flowing ultra-quiet (<17dB certified) Type AG Fill Valve. Pre-fitted & quality control sealed before dispatch.
- Wall brackets offer simple installation & adjustment to reduce errors & improve final installation quality.
- Universal 12" male quick connect water supply connection, to top or side, reducing supply pipe installation time.
- Suits all common floor standing & back to wall WC pans.
- Compatible with all TECE flush control plates, giving design, budget, and choice of over 250+ plates (futureproofing design or functionality preferences), with new “quick-fit” flush controls mounting system, saving time for installers.
- Cistern is factory fitted with anti-condensation insulation which also reduces flush and fill volumes further.
- Flush volume controls and settings (important for eco-water conscious consumers): Factory setting – 6ltr / 4ltr flush ; Instant User Setting – 4.5ltr / 3ltr or lower (3.5ltr / 2.4ltr possible) – Water release (dump) valve overflow provides certainty against flooding issues.
- Large capacity 10 litre polymer tank, allowing for 2 flushes, should water supply be cut off from cistern.
- Single Piece roto-moulded flush pipe (Non-Adjustable), sonically welded to cistern tank
- Unique Throttle Control System can adjust the flush performance (water velocity) to suit low flush volumes & rimless WC pans (optional accessory). Preventing overflows or insufficient flush pressure when rinsing the pan (making the perfect fit). A common issue when installing rimless pans.
- Tool free water inlet isolation valve (pre-installed and factory set to closed)

670mm (-40mm)
500mm x 139mm Max (front of Cistern)
188mm x 111mm, finished wall thickness 20mm > 90mm
Male 1/2" Mepla-Fix inlet connection & Stainless-Steel Reinforced Supply Hose
Rotationally Moulded Polymer, 2-piece height adjustable Flush Pipe
10 Litres, with "Reserve Tank" facility
Ex. Factory : 6.0-4.0 Litres, Eco adjustable : 3.5-2.4 litres (or less*)
0.5 Bar minimum - 10.0 Bar Maximum
ALL CONTROL PLATES suit ALL MODELS (separate order, see Datasheet)
Tested to 200,000 cycles in line with EN14055/CL2, WRAS, DIN EN
Well Label – Class A Water Efficiency, LGA, Kiwa Reg 4

Specification clause:

TECEbox 980mm WRAS approved WC Cistern with 10 litre capacity and 1/2" "Quick connect" water connection, for floor standing pans and compatible with ALL TECE flush controls, fitted to front of tank, factory sealed, and C/W all fittings and instructions, Unique tool free depth adjustable maintenance tunnel and quick release see-through splash guard. **WRAS Approval Nr. 2203336**

Contents:

Supplied in Single BOX (N.B. order control plates separately)

- TECE self-supporting, load bearing Installation Frame, with concealed cistern, & adjustable feet
- Fill & Flush Valves, 1/2" Brass Male Mepla-Fix water connection, Stop Valve, Stainless Steel Connection Hose, Flush Plate 'Rough-In' Template, Transparent Access Cover
- WC Connection Set incl. Flush Pipe, Soil Connection Elbow, & 90/110 Waste Pipe Adaptor.
- Contract Wall Fixing Brackets, WC Securing Studs & Nuts, Finishing Caps

Optional extras:

- Cleaning Tablet Insert Chute
- Control Plates in 100's of design & finish combinations
- Unique (Traditional) Lever Control Plates & Finish customisation options
- Odour Extraction connection flush pipes (3 accessory options available)

Packaging:

- Single Items, Heavy Duty Box: Size: 565mm x 520mm x 147mm
- Disposal: According to local bylaws
- Single cisterns double wrapped, quality assured, for peace of mind on quality and included parts

Installation Instructions:

- See Separate Sheet : Included in package

E&OE

We reserve the right to alter & amend specifications without prior notice. This is not a specification document & does not guarantee performance.

SPARES AND REPAIRS

We guarantee that spare parts will be available for all cisterns and frames for at least 25 years.
