

SEAMLESS DESIGN

TECEdrainline for liquid floors

Drainage systems close to you

SEAMLESS WITHOUT COMPROMISE

Until now, enthusiasts of seamless floor coverings in shower areas had to make compromises – a visible channel was usually unavoidable.

With TECEdrainline for liquid floors, compromises in creating a seamless shower area are now a thing of the past: the solution creates a seamless, minimalist look with no breaks in the material. All that remains visible is the slim water inlet. For a bathroom as if cast from a single piece.

Product highlights

- Excellent adhesion of liquid floor coverings thanks to high-quality mineral cast coating
- Invisible channel and insert
- Seal System sealing collar tested with many common composite seals

» A perfectly seamless bathroom is more than just design – it is the outcome of refined craftsmanship and perfectly coordinated products. Only this combination creates a space that is not only beautiful but also durable. «

Andreas Tasch, Managing Director, Murface GmbH

The installation in detail

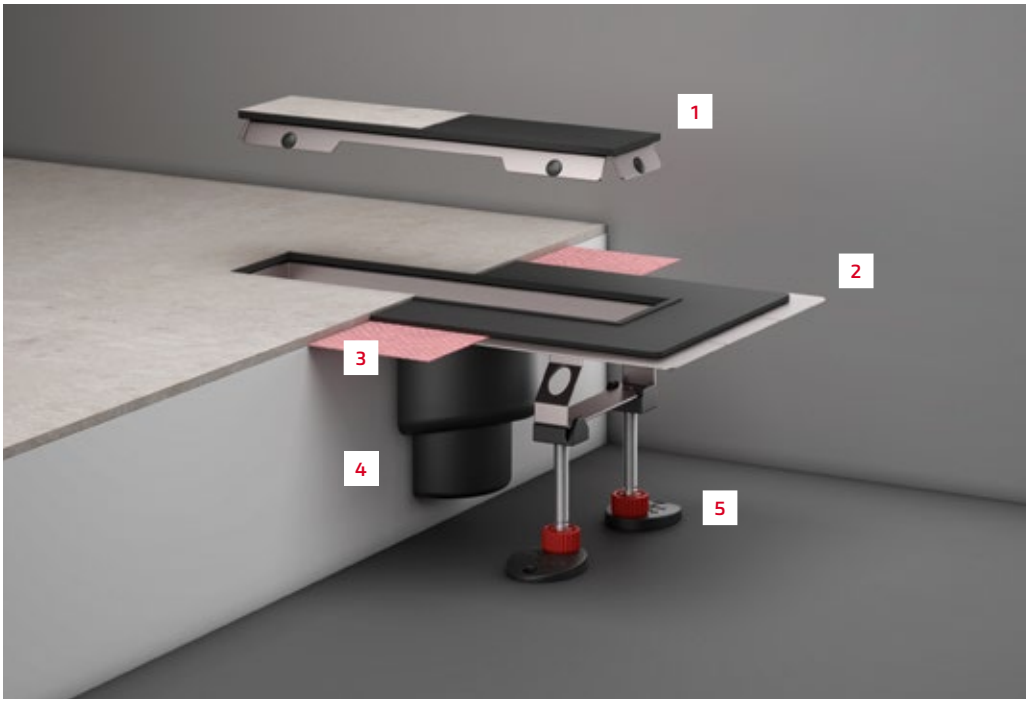

1 Channel insert
Stainless steel 1.4301 (304) channel insert with mineral cast surface for bonded application with liquid floor coverings.

2 Channel body
Seamless stainless steel channel body with mineral cast coating on the channel flange for bonded application with liquid floor coverings.

3 Seal System sealing collar
Factory-fitted, for incorporation into the composite seal, in accordance with DIN 18534.

4 Drain
Available in three heights, with a side drain or a vertical drain. Must be ordered separately.

5 Assembly feet (optional)
Assembly feet for easy height adjustment and positioning of the channel body during shell installation.

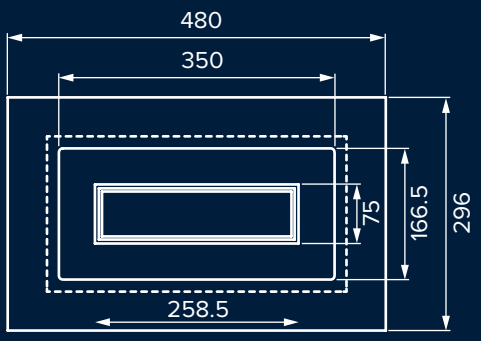

Product range overview

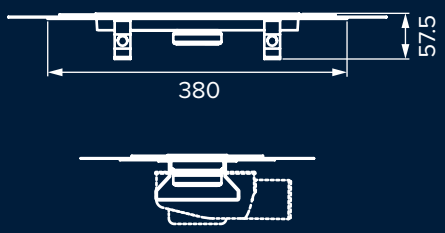

TECEdrainline for liquid floors consists of a channel and a channel insert, each made of stainless steel with mineral cast coating. It can be combined with one of four drains. Assembly feet in two different versions are available as an optional extra.

Illustration	Product	Item no.
